- Flexibilidade com data de início da assinatura
- Arquivos em **LOCKSS & Portico**
- Membro da **OASPA**

- *"BioOne Complete oferece a possibilidade de adquirir títulos de qualidade que, de outra forma, seriam difíceis de se obter. É uma maneira econômica para acessar journals em Biociências, seu custo está muito abaixo do custo médio de empréstimos entre Bibliotecas, o que é muito positivo. Se uma universidade está buscando pacotes em Ciências Biológicas, eu recomendaria BioOne Complete"*

BioOne Welcomes New Partners, Titles for 2018

BioOne proudly announces new content partnerships with seven societies, institutes, and associations from the UK, Germany, Czech Republic, Netherlands, and the US. Together these will enhance the full-text aggregation BioOne Complete with seven new journals for 2018. With these excellent additions, BioOne Complete will offer 207 high impact titles from leading nonprofit scientific publishers around the world.

Joining BioOne Complete in January 2018 will be:

Bradleya, published by the British Cactus and Succulent Society

Folia Zoologica, published by the Institute of Vertebrate Biology Academy of Sciences of the Czech Republic

Journal of Herpetological Medicine and Surgery, published by the Association of Reptilian and Amphibian Veterinarians.

Arachnologische Mitteilungen: Arachnology Letters, published by Arachnologische Gesellschaft e.V.

Bulletin of the British Ornithologists' Club, published by the British Ornithologists' Club

Lindbergia, published by the Dutch Bryological and Lichenological Society and Nordic Bryological Society

Lundellia, published by The Plant Resources Center, The University of Texas at Austin

These seven titles represent a wealth of content in herpetology, entomology, plant sciences, ornithology, and zoology. Their collective backfile encompasses over 10,000 new pages for BioOne Complete, adding to the aggregation's existing 1.4 million pages. 81% of BioOne Complete's 2018 subscribed titles have Impact Factors, and 30% are based outside the US. Furthermore, 69% of current titles are available in full-text XML exclusively through BioOne Complete.

Jan Zima, Editor-in-Chief of *Folia Zoologica*, commented:

"*Folia Zoologica*, the international journal of vertebrate zoology, has published scientific research in the field of animal biology since 1938. The 67th volume of the journal will appear in 2018 and we are proud to be able to extend our reach to the international zoological community as part of BioOne Complete. The journal is published by a small institution—the Institute of Vertebrate Biology, Czech Academy of Sciences—in a small country, and yet our contributions to the field are large. We are happy to find such an esteemed publishing partner as BioOne. Access to the BioOne Complete user community will allow us to disseminate more effectively novel and exciting findings in zoological research."
