BMJ Tutoriais

Olá, eu sou o **Dr. Benjamin**
e vou apresentar para vocês o **passo-a-passo**
de **utilização das revistas científicas** da BMJ:
BMJ Journals!

BMJ Journals

A coleção online dos periódicos da BMJ é mais do que somente a versão online dos periódicos impressos!

- ✓ Voltados para demandas educacionais e informacionais de profissionais e estudantes da Saúde
- ✓ Artigos sobre avanços tecnológicos e pesquisas mais atuais produzidas por líderes em suas áreas
- ✓ Informações relevantes para o seu interesse ou especialidade
- ✓ Mecanismos digitais para utilização das plataformas online

Lista de periódicos assinados pela CAPES

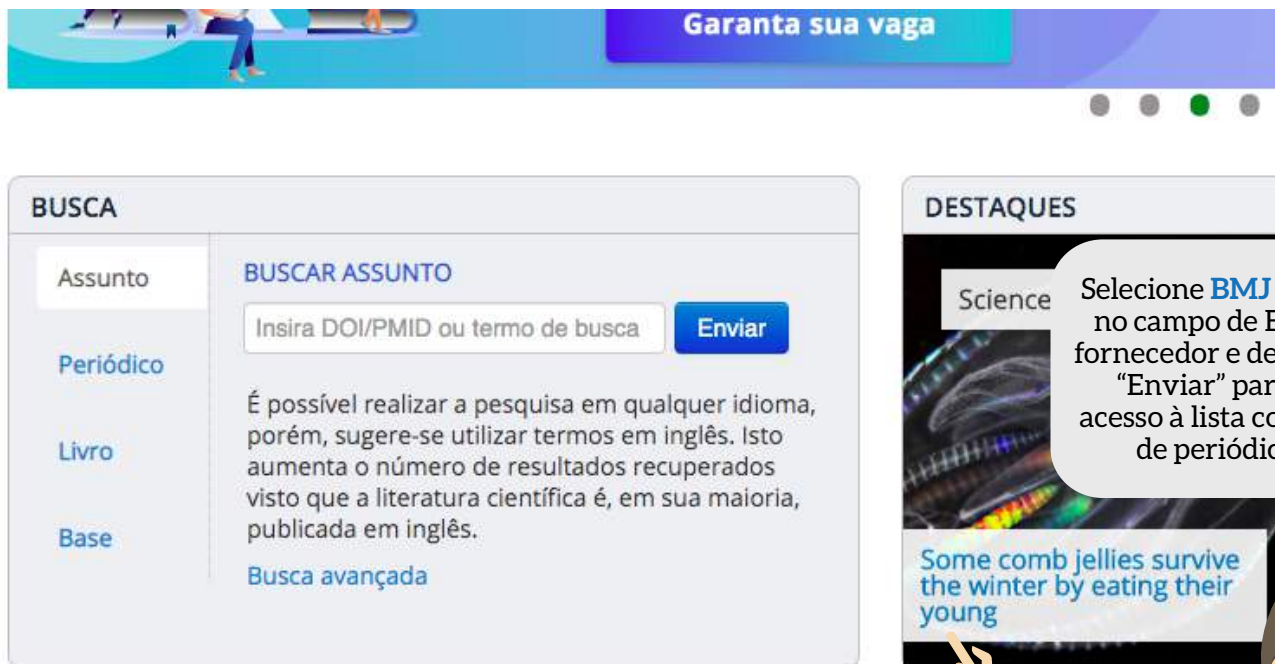

Esta é a lista de periódicos assinados pela CAPES que você pode ter disponível para acesso!

Acupuncture in medicine
Annals of the Rheumatic Diseases
Archives of Disease in Childhood
Archives of disease in childhood.
Education and practice edition
British journal of ophthalmology
British Journal of Sports Medicine
Emergency Medicine Journal : EMJ
Evidence-based medicine
Evidence - Based Mental Health
Evidence-based nursing
Frontline gastroenterology
Gut
Heart
In practice
Injury prevention

Journal of Clinical Pathology
Journal of Epidemiology and Community Health
Journal of Medical Ethics
Journal of Medical Genetics
Journal of NeuroInterventional Surgery
Journal of Neurology, Neurosurgery and Psychiatry
Journal of the American Medical Infor - matics Association
Medical humanities
Occupational and Environmental Medicine
Postgraduate Medical Journal
Practical Neurology
Quality & Safety in Health Care
Sexually Transmitted Infections
Thorax
Tobacco Control
Veterinary record

Para encontrar as revistas científicas da BMJ através do campo de busca no Portal de Periódicos da CAPES, acesse o site <http://periodicos.capes.gov.br> e no menu ao lado esquerdo da tela clique em **Buscar periódico**.

A lista completa de revistas científicas assinadas pela CAPES aparecerá e você poderá escolher em qual título realizar sua pesquisa.

Título inicia por:

* Jour - Vete

Exibindo 1 a 30 de um total de 32 registros. [Lista detalhada de resultados](#)

Exibindo página 1 de 2.

Titulo do periódico	ISSN	Ações
Acupuncture in medicine	0964-5284	  
Annals of the Rheumatic Diseases	0003-4967	  
Archives of Disease in Childhood	0003-9888	  
Archives of disease in childhood. Education and practice edition	1743-0585	  
BMJ. British medical journal	0959-8146	  

Você também pode utilizar o link <http://journals.bmj.com> para acessar os periódicos da BMJ caso sua instituição realize uma assinatura.

A busca pode ser realizada selecionando um título em **“Browse Journals”** ou através de uma palavra-chave em **“Search Journals”**. Na opção **“More search options”** você poderá selecionar filtros avançados de busca.

Ao abrir o site do periódico, é possível encontrar um menu superior que facilita sua navegação pela página e também um campo de busca por palavra-chave.

No menu **“Online First”** você encontrará os artigos publicados primeiramente no site do periódico e que podem ser visualizados por ordem de data.

Já em **“Current Issue”** – última edição – você terá acesso aos artigos publicados no número mais recente da revista científica.

Current Issue

October 2016 - Volume 21 - 5

- EBM Primer
- Systematic review
- Therapeutics/Prevention
- Prognosis
- Aetiology/Harm
- Diagnosis
- Letters

Ao selecionar um artigo científico, um menu do lado esquerdo disponibilizará mecanismos de aproveitamento do conteúdo disponível.

Transfemoral transcatheter aortic-valve replacement should be preferred over surgery in most intermediate-risk patients

Corrado Tamburino, Piera Capranzano

[Author affiliations +](#)

<http://dx.doi.org/10.1136/ebmed-2016-110484>

Commentary on: Leon MB, Smith CR, Mack MJ, et al., PARTNER 2 Investigators. Transcatheter or surgical aortic-valve replacement in intermediate-risk patients. *N Engl J Med* 2016;374:1609–20 [CrossRef](#) [Medline](#).

Context

Evidence derived from randomised clinical trials support transcatheter aortic valve replacement (TAVR) as a choice for patients with aortic stenosis with a prohibitive surgical risk and as a valid alternative therapy for those at high-risk of surgical mortality. Owing to increases in operator experience as well as improvements with transcatheter techniques and devices associated with reduction in procedural complications, TAVR has been progressively extended to less risky patients,¹ despite the lack of rigorous clinical-trial assessment of this expansion. In the Placement of Aortic Transcatheter Valves 2 (PARTNER-2) Cohort A randomised trial, safety and effectiveness of TAVR with a lower-profile second-generation valve system were compared with conventional surgical aortic valve replacement (SAVR) in patients with intermediate-risk clinical profiles.

About

Aims and scope

BMJ Evidence-Based Medicine.

- Publishes original evidence based research, insights and opinions on what matters for health care
- Focuses on the tools, methods, and concepts that are basic and central to practising evidence-based medicine.

How we deliver relevant, trustworthy and impactful evidence:

1. **By Disseminating relevant research: saving you time and improving your practice** – *BMJ Evidence-Based Medicine systematically searches international medical journals and applies strict criteria to identify relevant research. Content is critically appraised, leading to a succinct commentary focusing on the paper's key findings and implications for clinical practice.*
2. **By Providing debate, analysis, and opinion on trusted evidence that matters for better healthcare** – *BMJ Evidence-Based Medicine debates the uncertainties and controversies in evidence and the research methods that educate and inform practice.*
3. **By Publishing original research that affects practice** – *BMJ Evidence-Based Medicine publishes the latest research that enhances the practice and understanding of evidence-based healthcare.*

Editorial Board

For information about the Editor-in-Chief and editorial team, please refer to the [Editorial Board](#) page.

Ownership

BMJ Evidence-Based Medicine is owned by BMJ.
