Begell Digital Library (BDL)

Olá, eu sou a **Carol**
e vou acompanhar vocês no **passo-a-passo**
do **Begell Digital Library!**

Aqui vamos entender todo passo-a-passo de utilização do

Begell Digital Library.

Primeiramente, busque pelo título da base no **Portal de Periódicos da CAPES** o campo "Buscar base" para acessá-la através da sua instituição.

A **Biblioteca Digital da Begell (BDL)** nada mais é do que um banco de dados que abrange textos completos, além de fornecer os mais recentes dados de **pesquisas** e **informações** através de um amplo espectro de **Engenharia** e **Ciências Biológicas**.

Lá, você encontrará revistas profissionais, as principais referências de engenharia, procedimentos da conferência do Centro Internacional de Calor e Transferência de Massa (ICHMT), eBooks e muito mais.

Todas as informações da BDL foram recolhidas a partir das fontes **mais confiáveis** em um determinado campo e são indexadas depois de passarem por **revisões** de pesquisadores da mesma área.

Você pode utilizar a barra de menu cinza na página inicial para navegar diretamente em todas as coleções de pesquisa disponíveis, revistas, referências, processos e bases de dados.

The screenshot shows the homepage of the Begell Digital Library. A red rectangular box highlights the top navigation bar, which includes the logo, language options, help links, submission links, and a search bar. Below the navigation bar, the page is divided into several sections:

- Begell Digital Portal**: A search bar with a 'Search' button.
- Begell Digital Library News**: A list of four news items, each with an icon and a brief description of new applications or updates.
- Research Collections**: A list of research collections, including 'The Engineering Research Collection' and 'The Biomedical Research Collection'.
- Databases**: A list of databases, including 'THERMOPEDIA', 'Directory of Specialists', 'Heat Exchanger Design Handbook - Online', and 'The Catalog of Worldwide Nuclear Testing'.
- References**: A list of references, including 'Annual Review of Heat Transfer', 'Electrospinning of Micro- and Nanofibers', and 'Molecular Dynamics Potential Functions'.
- Most Popular**: A list of popular items, including 'International Journal for Uncertainty Quantification Open Access', 'International Journal for Multiscale Computational Engineering', 'Visualization of Mechanical Processes Free Online Access to Volume 1', and 'Critical Reviews™ in Eukaryotic Gene Expression'.

O conteúdo da **Coleção de Pesquisa em Engenharia** concentra-se principalmente nas seguintes áreas:

- Aeroespacial
- Química e Engenharia Química
- Energia e Meio Ambiente
- Industrial
- Engenharia Mecânica
- Engenharia Nuclear

● Revistas

- Atomization and Sprays
- Catalysis in Green Chemistry and Engineering
- Composites: Mechanics, Computations Applications, An International Journal
- Computational Thermal Sciences: An International Journal
- Critical Reviews in Biomedical Engineering
- Heat Pipe Science and Technology: An International Journal
- Heat Transfer Research
- High Temperature Material Processes: An International Journal
- Interfacial Phenomena and Heat Transfer
- International Journal for Multiscale Computational Engineering
- International Journal for Uncertainty Quantification
- International Journal of Energetic Materials and Chemical Propulsion

The Biomedical Research Collection

Biomedical Sciences Journals Collection is a consolidated, selected and peer-reviewed collection of online data of the latest leading academic, research, and clinical work in the field of biomedical sciences. All information is delivered online in the full-text journal articles and other full text peer-reviewed research data.

Begell Digital Library (**BDL**)

Agora, vamos entender como acessar e
baixar os artigos das revistas?

Guia de usuário e funcionalidades de pesquisa

Clique na aba "Journals" na barra de menu cinza na página inicial da BDL. Em seguida, selecione o título do periódico desejado na lista, clicando diretamente no título.

The screenshot displays the Begell Digital Library (BDL) website. At the top, there is a navigation bar with the BDL logo, language options (English), and links for Help, Submit an Article, Customer Login, and Shopping Cart. Below this is a secondary navigation bar with tabs for Begell Digital Portal, Begell Digital Library, eBooks, Journals (highlighted), References & Proceedings, and Research Collections. A search bar is also present. The main content area shows the 'Atomization and Sprays' journal page. On the left, there is a thumbnail of the journal cover, its impact factor (1.235), 5-Year Impact Factor (0.750), and ISSN information. The central part of the page lists the journal's volumes from 2003 to 2017. On the right, there is a sidebar with links to various journal features like 'Access Full Text', 'Forthcoming Articles', 'Editorial Board', 'Author Instructions', 'Submit an Article', 'Get Permissions', 'Publication Ethics and Malpractice', 'Recommend to my Librarian', 'Download MARC record', and 'Bookmark this Page'. At the bottom right, there is a section for 'Atomization and Sprays' with a brief description of its content.

ABSTRACT

In this short note we address a key issue regarding the time evolution of the surface tension of droplets that are made up of gasoline and alcohol blends. The burning process, and thus its efficiency and exhaust gas composition, in any combustion system (including SI and CI combustion engines) is strongly affected by the basic characteristics of the fuel spray. The droplets' size and size uniformity are two of the more important properties. Smaller droplets will evaporate, mix, and burn faster than larger ones. Reliable evaluation of the droplets' size in terms of the injection pressure, injector geometry, and the fuel properties is an essential tool for the combustion chamber designer. In this context, a major fuel property is the surface tension of the fuel. Here we show how the surface tension of a fuel droplet may vary with time during its injection process, thus affecting its size. The surface tension variation is mainly attributed to the molecular mobility of the surfactant while the liquid/gas interface grows. We present some measurements of the dynamic surface tension of gasoline/alcohol blends and compare them to the equilibrium value. We used the maximum bubble pressure method to determine the dynamic surface tension. Gasoline with an octane number of 95 was used as the basic fuel to be mixed in different proportions with ethanol or methanol.

KEY WORDS: dynamic surface tension, gasoline-ethanol and -methanol blends, maximum bubble pressure method (MBPM)

Entendi, Carol!
E como eu faço para acessar e-books e
fazer o download de capítulos?

Deixa comigo!

Begell Digital Library (BDL)

Selecione a aba “e-books” na barra do menu cinza na página inicial da BDL ou escolha qualquer um dos títulos de eBooks da lista na página inicial da Coleção de Pesquisa em Engenharia.

Você será direcionado para a página inicial para a série de e-books, a série em Física e Engenharia Térmica e de Fluidos.

The screenshot displays the Begell Digital Library (BDL) website. At the top, there is a navigation bar with the logo "begell house digital library" on the left and links for "English", "Help", "Submit an Article", "Begell House", and "Contact Us" on the right. Below this, there are links for "Customer Login" and "Shopping Cart". A banner indicates "Library Subscription: Universidade de São Paulo". The main navigation menu includes "Begell Digital Portal", "Begell Digital Library", "eBooks", "Journals", "References & Proceedings", and "Research Collections". An "Advanced Search" box is located on the right side of the menu. The "eBooks" section is active, showing a list of books under the heading "Fluid Mechanics". The books listed are:

- Gas-Liquid Flows by Barry J. Azzopardi
- Heat Transfer and Fluid Flow in Microchannels by Gian Piero Celata
- Radiative Transfer in Combustion Systems: Fundamentals and Applications by Raymond Viskanta
- Thermal Radiation Fundamentals by K. G. Terry Hollands
- Practical Heat Transfer by Peter D. Hills
- Heat Transfer in Dispersions by Yu. A. Buynovich, Dmitri V. Alexandrov

Below this list, the "Heat Exchangers" section is visible, starting with "Energy and Process Integration" by Efstratios N. Pistikopoulos and Michael C. Georgiadis. On the right side of the page, there is a "Shop Now" section featuring three books for sale:

- Gas-Liquid Flows by Barry J. Azzopardi, priced at \$232.00, with a "Buy Now" button.
- Contemporary Perspectives on Air Cooling of Electronic Components by Raymond Viskanta, priced at \$159.00, with a "Buy Now" button.
- Contemporary Perspectives on Flow Boiling Instabilities in Microchannels and Minichannels by Yu. A. Buynovich, Dmitri V. Alexandrov, priced at \$159.00, with a "Buy Now" button.

ISBN: 1-56700-233-1

Gas-Liquid Flows

Barry J. Azzopardi

Department of Chemical, Environmental and Mining Engineering, The University of Nottingham, University Park, Nottingham NG7 2RD, England

Description

Gas-liquid flows, arising as it does out of Master level and post experience courses, is particularly suitable for these audiences. However, book will also be a valuable source to researchers, not only to new readers coming to the subject for the first time, but also to those more experienced who will gain new insights from its contents. Amongst its aims are to bring together communality of features in two-phase flow across flow patterns and geometries and to put new material into the context of earlier work showing how early and later descriptions have a common root. The book introduces the basic methods used for two phase design methods, particularly for pressure drop. It goes on to introduce flow patterns and the physics of the transitions between them. It goes on to examine the major flow patterns, concentrating on annular flow in vertical pipes. It finishes with chapters on geometries other than pipes, including pipe junctions.

Você também pode pesquisar usando o menu no lado esquerdo da tela ou usando o mapa de navegação visual.

Como navegar nas bases de dados

A navegação visual é uma estrutura de árvore que fornece uma fácil ligação visual para artigos de textos completos que direcionam para o conteúdo de outras editoras via CrossRef.

Ao clicar em um tópico principal, outros sub-temas se ramificarão do tema principal. **Você pode navegar pelos conteúdos!**

The screenshot shows the THERMOPEDIA website. At the top, there is a navigation bar with links for English, About, Editorial Board, Contact Us, Subscription Policy, and Regell House. Below this is a banner with the text "Library Subscription: Universidade de Sao Paulo". The main navigation bar includes links for HOME, SEMANTIC MAP (which is highlighted), A-Z INDEX, VISUAL GALLERY, AUTHORS, and MY THERMOPEDIA, along with a search bar. The SEMANTIC MAP section displays a hierarchical tree structure. On the left, under "SUBJECTS", there is a list of topics: Thermopedia (selected), Applications, Computational Methods, Experimental Techniques, Fundamentals, History, and Interdisciplinary Content. Below this, under "TOPICS", there is a list of sub-topics: Fluid Flow, Multiphase Phenomena, MASS TRANSFER, HEAT TRANSFER, and PHASE CHANGE HEAT TRANSFER. On the right, a visual representation of the semantic map shows a central node labeled "Thermopedia" connected to six sub-nodes: Applications, Computational Methods, Experimental Techniques, Fundamentals, History, and Interdisciplinary Content.

Como navegar nas bases de dados

Ah, mais uma coisa: um ícone de papel significa que há um artigo disponível para esse tema, um ícone de lápis significa que há um artigo sendo escrito para esse tópico, mas ainda não está disponível.

www.thermopedia.com

Catálogo mundial de teste nuclear

O Catálogo Mundial de Teste Nuclear é a primeira compilação completa de todos os testes nucleares. Ele apresenta uma análise de classificação uniforme dos cinco estados de armas nucleares, incluindo dinâmicas, rendimentos e métodos de testes.

The Catalog of Worldwide Nuclear Testing - Online

Editor-in-Chief: Victor Mikhailov

The *Catalog of Worldwide Nuclear Testing*, **CWNT**, is the first-ever, complete and unique compilation of all nuclear tests.

Containing various vital information and data on all 2049 nuclear tests conducted by the United States, Soviet Union, United Kingdom, France, and China. The Catalog presents a uniform classification analysis of the five nuclear-weapon states, including the dynamics, yield, methods of testing, name and date of tests, location and type, purpose, cumulative yield. The Catalog also includes information on the recent nuclear tests in India and Pakistan.

This unique volume has been compiled by a team of the best specialists of the Russian nuclear weapons establishment, headed by the former Minister of Atomic Energy of Russia, Victor Mikhailov, and including the following individuals: I.A. Andryushin, A.K. Chernyshev, R.I. Ilkaev, A.M. Matushchenko, L.D. Ryabev, V.G. Stukov, N.P. Voloshin, and Yu. A. Yudin.

In order to make the information searchable, interactive and more accessible to the user, Begell-Atom is proud to present **CWNT ONLINE**, the web version of **CWNT**.

Now, subscribers are able to gain easier access to **CWNT ONLINE** at multiple locations, making it particularly suitable for use by individual researchers as well as governmental organizations and research institutions on a multiple basis with immediate access.

Catálogo mundial de teste nuclear

Para navegar pelos conteúdos, selecione “ACCESS FULL TEXT” no menu cinza (MENU 1) no lado direito da tela ou selecione qualquer seção do menu do lado esquerdo da tela (MENU 2).

CATALOG OF WORLDWIDE NUCLEAR TESTING

The book provides a classification of nuclear tests conducted by five nuclear states (USA, USSR, UK, France and China) from 1945 through 1996. It is the first attempt to show the entire picture and to describe, in a comparative manner, the main features of the nuclear testing programs of all nuclear states. The book includes a unified catalog of all known nuclear tests with their basic characteristics, and comments to the catalog. The book has been published in English and is intended for a wide range of specialists, and those in the public who are interested in the history of nuclear weapons creation and development of nuclear technologies.

The book consists of the following sections:

- Introduction
- Section 1. Classification of Nuclear Tests in the Unified Catalog
- Section 2. Areas of Nuclear Testing
- Section 3. Nuclear Tests and Peaceful Nuclear Explosions (1945-1996)
- Section 4. General Characteristics of Nuclear Tests
- Section 5. Distribution of US Nuclear Tests by Operations
- Section 6. Nuclear Explosions of India and Pakistan
- References

The book has been prepared by a group of experts from the Ministry of the Russian Federation for Atomic Energy and RFNG-VNIIEF including I. A. Andryushin, N. P. Voloshin, R. I. Ikaev, A. M. Matushchenko, L. D. Ryabev, V. G. Strukov, A. K. Chernyshev, and Yu. A. Yudin. The Editor-in Chief of the book is Member of Academy V. N. Mikhailov, Minister for Atomic Energy (1992-1998).

The book was published by Begell-House, Inc., New York in 1999.

Uma vez na página inicial do Catálogo, você pode selecionar qualquer sessão para navegar pelo conteúdo. Cada sessão não aparece como PDF, mas continuará na tela para uma fácil navegação.

Use os botões de “Seguinte” e “Voltar” em cima e no fim da página para ir para a página seguinte ou anterior.

Você também pode utilizar os botões de “Voltar” e “Avançar” no seu navegador.

Diretório de especialistas

O Diretório de Especialistas (DS) é uma base de dados online que contém perfis de especialistas de Engenharia do mundo todo. O propósito deste diretório é oferecer a possibilidade de encontrar profissionais especializados e suas informações de contato para indústrias

The screenshot displays the web interface of the Directory of Specialists (DS). At the top left is the logo, which consists of a blue square with a white 'D' and a globe icon, followed by the text 'DIRECTORY OF SPECIALISTS'. To the right of the logo is a search bar with a magnifying glass icon. Below the search bar, it says 'Library Subscription: Universidade de Sao Paulo' and a link 'Change subscription'. A navigation bar below the logo contains three buttons: 'Home' (highlighted in green), 'New Entry Request', and 'Directory List'. Below the navigation bar, the text 'Welcome to Directory of Specialists' is followed by a paragraph: 'You have entered the Directory of Specialists, (DS). This site will allow you to locate a specialist by name, field of specialization, and/or affiliation. Please enter the information you are seeking in one or more of the fields listed below, then click on Search Specialist.' Below this text is a search form with three input fields: 'First, Last name:', 'Country:', and 'Affiliation:'. There is a dropdown arrow next to the 'Country:' field. Below the 'Affiliation:' field is a link 'Select Specialization Area:'. To the right of the input fields is a blue button labeled 'Search Specialist'.

Centro Internacional de Calor e Transferência de Massa - International Centre for Heat and Mass Transfer (ICHMT Digital Library)

A ICHMT Digital Library é uma base de dados online de todos os anais de todas as conferências feitas pelo Centro Internacional de Calor e Transferência de Massa desde 1982.

www.dl.begellhouse.com/ICHMT

The screenshot displays the ICHMT Digital Library website. At the top, the header includes the ICHMT logo, the text 'International Centre for Heat and Mass Transfer DIGITAL LIBRARY', and navigation links for 'English', 'Help', 'Contact Us', 'Begell House Digital Library', 'Customer Login', and 'Shopping Cart'. Below the header is a navigation bar with tabs for 'ICHMT DL Home', 'Current Year', 'Archives', 'Executive Committee', and 'International Centre for Heat and Mass Transfer'. A search bar is located on the right side of this bar.

The main content area is titled 'Welcome to the ICHMT Digital Library!'. It contains a paragraph describing the library's mission and a note about Begell House Publishers, Inc. Below this, there is a section for 'Most Downloaded Articles' listing several papers with their titles and authors.

On the left side, there is a vertical list of years from 1987 to 2015, each preceded by a right-pointing arrow. On the right side, there is a sidebar with a list of links: 'Access Full Text', 'Editorial Board', 'Publication Ethics and Malpractice', 'Recommend to my Librarian', 'Download MARC record', and 'Bookmark this Page'. Below this list is a section titled 'ICHMT Digital Library' with a description of the library's content and a small image of a book cover.

Como navegar pelos anais

Para ver os anais de qualquer conferência disponível, use o menu do lado esquerdo da tela e selecione o ano desejado, o que vai fazer com que todas as conferências disponíveis daquele ano apareçam no topo da tela.

Volume selection

The screenshot displays the ICHMT Digital Library website. At the top, the header includes the ICHMT logo, the text "International Centre for Heat and Mass Transfer DIGITAL LIBRARY", and navigation links for English, Help, Contact Us, Begell House Digital Library, Customer Login, and Shopping Cart. Below the header, a navigation bar contains links for ICHMT DL Home, Current Year, Archives, Executive Committee, and International Centre for Heat and Mass Transfer, along with an Advanced Search box. The main content area is titled "ICHMT DL > 2000" and features a "Published in 2000" section. On the left, a "Volume selection" menu lists years from 1992 to 2015, with 2000 highlighted. The "Published in 2000" section lists two volumes of "Thermal Sciences 2000. Proceedings of the International Thermal Science Seminar Bled, Slovenia, June 11 - 14, 2000". A red box highlights the "Access Full Text" link for the first volume. Below this, the "Most Downloaded Articles" section lists several papers. On the right, a sidebar titled "ICHMT Digital Library" provides a view of engine compartment components and a link to "Access Full Text".

Welcome to International Heat Transfer Conference Digital Library

The International Heat Transfer Conferences (IHTC) – the Heat Transfer Olympics – has a long and rich history that dates back to the International Discussion on Heat Transfer held in London and Atlantic City in 1951. The four-year IHTC cycle began with the third conference, held in Chicago, Ill in 1966, where the Assembly for International Heat Transfer Conferences (AIHTC) was founded.

The principal goal of the Assembly is to create and sustain a worldwide forum for heat and mass transfer specialists to present research results, discuss the state of the art, and identify the future direction and priorities in various domains of thermal science and engineering.

Professors Hartnett, Rohsenow, Eckert, and Kezios from the USA and Kutateladze from the USSR were among the leaders in creating this Assembly. Since 1966, the four-year cycle of IHTC meetings was held in Europe, Asia, and North America with an average of more than 1000 attendees.

In 2012, AIHTC Executive Delegates agreed to archive all proceedings dating back to 1951, thus, establishing an IHTC Digital Library to preserve information online that would make it easily accessible for future research and education, and to the heat transfer community.

The IHTC Digital Library has a broad topical coverage that includes fundamentals of thermal transport phenomena, traditional heat transfer applications, insightful exploration of renewable and sustainable energy conversion systems, and alongside is the emerging domains of heat transfer in bio-systems, information systems, MEMS, and nano materials, that speaks loudly and clearly to the centrality of thermal science and engineering in the pursuit of a better life for all people everywhere.

Annual Review of Heat Transfer

Aims and Scope

The volumes of Annual Review of Heat Transfer published up to 2005 had been created and edited by Professor Chang-Lin Tien who passed away in 2002. Chang-Lin had an immense and long-lasting impact on the heat transfer community through his pioneering research and community service in heat transfer. This series, itself, is a product of Chang-Lin's leadership and dedicated service. The present Editors decided to use Volume XIV as a bridge between the past and the future, by summarizing Chang-Lin's contributions and reviewing current and future research directions in areas in which Professor Tien made a significant impact. In this volume we have divided his contributions into six topical areas: radiation and combustion, micro/nanoscale heat transfer, phase change and heat pipes, porous media, materials processing and laser materials interactions, and energy systems.

The previous volumes of Annual Review in Heat Transfer reflect all aspects of heat transfer and fluid flow as depicted by an array of the top international specialists in the field. Future volumes are being planned to include the modern achievements in the thermal and fluids sciences.

Description

Atmospheric pollution caused by the uncontrolled development of industrial technologies, has now reached the danger point, past which its irreversible effect on natural factors and the resulting danger to living organisms and to future human generations starts outweighing the advantages of technological progress. The increase in the appearance and development of increasingly more ecology-damaging industries such as nuclear power generation, modern chemistry and biotechnologies, have resulted in the appearance of the so-called ecology-protection technologies. The danger of environmental pollution, leads to the optimal selection of environmental protection technologies and monitoring their effectiveness lies outside the competence of those who design and operate polluting industries and becomes increasingly more the prerogative of special expert and monitoring services. High-efficiency gas purification by Petryanov filters is one such universally acknowledged aerosol-removal technology. These filters are made of fibrous materials obtained by means of electrospinning. The substance and capabilities of this method, the use of the fibrous materials produced by it, the various and unique separating properties embodied in the present volume. The authors know that the present monograph will be useful not only to design and production engineers but also to a number of other experts, whose activity in the scientific, industrial, managerial, judicial, educational and humanitarian fields is related to some extent to the problem of protecting the environment and the health of the population. The following topics are included in this book: Mechanism of electrospinning of fibrous materials and the structure of these materials, Raw materials, Effect of the properties of the spinning solution on the course of formation and properties of fibers, Technology of electrospinning of fibrous materials (Petryanov Filters) and their analogs, Relationships governing the capture of aerosol particles by fibrous filters, Functional and performance properties of Petryanov-Filter (PF) materials and of their analogs, Construction, testing, manufacturing and assortment of fibrous PF-materials based high-efficiency aerosol filters, and Applications of modular high-efficiency aerosol filters and filtering stations employing PF filtering materials and their analogs for high-efficiency gas filtration.

Para acessá-lo, vá até a página inicial BDL (www.dl.begellhouse) e selecione o título listado em “Referências e Procedimentos”.

Todos os capítulos estão listados na página inicial de Referência, e você pode baixar os capítulos, clicando no ícone “download” ao lado do título do capítulo.

Existem diversas áreas de foco dentro de cada capítulo.

Busca geral

The screenshot displays the Begell Digital Library website. At the top, the logo 'begell house digital library' is on the left, and navigation links for 'English', 'Help', 'Submit an Article', 'Begell House', and 'Contact Us' are on the right. Below these are links for 'Customer Login' and 'Shopping Cart'. A banner indicates the library subscription is for 'Universidade de São Paulo'. The main navigation bar includes 'Begell Digital Portal', 'Begell Digital Library', 'eBooks', 'Journals', 'References & Proceedings', and 'Research Collections'. A search bar labeled 'Advanced Search' is highlighted with a red box. On the left, a sidebar with a red border contains a search form with fields for 'All Content', 'Publication Title', and a 'Search' button. Below this, a section titled 'Begell Digital Library News' features four announcements for mobile applications: iBegell for Android, iPad, iPhone, and IJUQ for iPad. The main content area is divided into three columns: 'Research Collections' (listing Engineering and Biomedical collections), 'Databases' (listing THERMOPEDIA, Directory of Specialists, Heat Exchanger Design Handbook, and The Catalog of Worldwide Nuclear Testing), and 'References' (listing Annual Review of Heat Transfer, Electrospinning of Micro- and Nanofibers, and Molecular Dynamics Potential Functions). A 'Most Popular' section on the right lists three journals: International Journal for Uncertainty Quantification Open Access, International Journal for Multiscale Computational Engineering, and Visualization of Mechanical Processes Free Online Access to Volume 1.

Uma vez que os resultados de pesquisa gerais aparecerem, você pode usar as opções de busca avançada para restringir o alcance dos seus resultados.

Como navegar pelas referências

Ao usar a pesquisa avançada, você pode filtrar os resultados, modificando alguns itens em sua busca.

Opções para filtrar os resultados:

- Pesquise por frase, palavra-chave, ou “todas estas palavras”
- Busque por autor ou publicação ISSN / ISBN
- Pesquise por tipo de recurso (eBooks e jornais, as revistas só, etc)
- Restrinja resultados escolhendo o período de tempo (2001-2007 apenas)

Como navegar pelas referências

The screenshot shows the Begell House website interface. At the top, there is a navigation bar with the logo 'begellhouse' and the tagline 'The Home for Science and Engineering™'. To the right of the logo are links for 'English', 'About Begell House', 'Help', and 'Contact Us'. Below these are links for 'Customer Login' and 'Shopping Cart'. A horizontal menu bar contains links for 'Home', 'By Subject', 'Books', 'eBooks', 'Journals', 'References & Proceedings', 'Authors, Editors, Reviewers', and 'Begell Digital Library'.

On the left side, there is a 'Filter search results by:' section with a list of categories and their counts: Journals [184], Books [4], Databases [124], Research Collections [1914], and References [257].

The main content area is titled 'Search results for bubble flow'. It features a search bar with the text 'bubble flow' and a 'Search' button. Below the search bar is an 'Advanced Search' section with various filters. A red box highlights the 'Find results:' dropdown (set to 'All these words'), the 'Resource type:' checkboxes (Journals, Databases, Books, References), and the 'Published years:' range selector. Another red box highlights the 'Sort by:' dropdown, which is set to 'relevance'.

The search results list begins with the entry: 'BUBBLE FLOW A. Serizawa I. Kataoka Following from: Gas-liquid flow RelatesLink: oResource Articles , HEDH-Online DOI: 10.1815/AtoZ.b.bubble_flow General Description Bubble flow is defined as a Two-Phase Flow where small bubbles are dispersed or suspended as discrete substances in a liquid continuum. Typical features of this flow...'. Below this entry, it says 'Article of database "Thermopedia" | Kataoka, Isao | 2010'.

Nesse exemplo, a pesquisa do usuário é sobre o conteúdo “Fluxo de bolhas”. Quando a pesquisa geral terminou, havia 27 páginas de resultados. O usuário, em seguida, modificou a pesquisa:

- Excluídos “bancos de dados” e “referências”, optando por apenas pesquisar em “Revistas” e “Livros”
- Introduzido “2004-2005” no campo “ano de publicação”

Os resultados, em seguida, vão se reduzir a apenas 3 páginas. Você também pode classificar os resultados por “data de publicação” ou “relevância”. Esta opção de classificação situa-se acima do primeiro resultado da pesquisa.
